

Task 4: Console-Based Mini Project

Goal

Store data in files and learn basic version control.

Requirements

- Read/write data using FileReader and FileWriter
- Use Git to push project to GitHub
- Write a simple README file

Code Snippets:

```
import java.io.*;
```

```
import java.util.Scanner;
```

```
public class task4 {
```

```
    public static void main(String[] args)
```

```
    {
        Scanner sc = new Scanner(System.in);
```

```
        try {
```

```
            System.out.print("Enter Student Name: ");
```

```
            String name = sc.nextLine();
```

```
            System.out.print("Enter Student Marks: ");
```

```
            int marks = sc.nextInt();
```

```

            FileWriter w1 = new FileWriter("students.txt");
```

```
            w1.write("Student Name: " + name + "\n");
```

```
            w1.write("Student Marks: " + marks);
```

```
w1.close();

System.out.println("\nData written successfully.");

FileReader r1 = new FileReader("students.txt");
int ch;
System.out.println("\nReading File Content:\n");
while ((ch = r1.read()) != -1) {
    System.out.print((char) ch);
}

r1.close();

} catch (IOException e) {
    System.out.println("File not found. Error: " +
e.getMessage());
}

}

}
```

Screenshots:

```
J task4.java • students.txt
J task4.java
1  import java.io.*;
2  import java.util.Scanner;
3
4  public class task4 {
5
6      public static void main(String[] args) {
7
8          Scanner sc = new Scanner(System.in);
9
10         try {
11
12             System.out.print("Enter Student Name: ");
13             String name = sc.nextLine();
14
15             System.out.print("Enter Student Marks: ");
16             int marks = sc.nextInt();
17
18             FileWriter w1 = new FileWriter("students.txt");
19
20             w1.write("Student Name: " + name + "\n");
21             w1.write("Student Marks: " + marks);
22             w1.close();
23
24             System.out.println("\nData written successfully.");
25
26             FileReader r1 = new FileReader("students.txt");
27             int ch;
28             System.out.println("\nReading File Content:\n");
29
30             while ((ch = r1.read()) != -1) {
31                 System.out.print((char) ch);
32             }
33             r1.close();
34         } catch (IOException e) {
35
36             while ((ch = r1.read()) != -1) {
37                 System.out.print((char) ch);
38             }
39             r1.close();
40         } catch (IOException e) {
41             System.out.println("File not found. Error: " + e.getMessage());
42         }
43     }
44 }
```

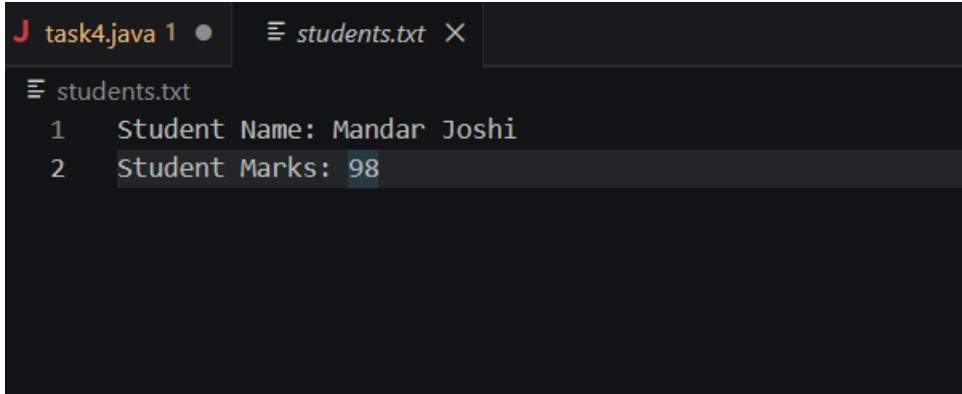

Output:

```
Enter Student Name: Mandar Joshi  
Enter Student Marks: 98
```

```
Data written successfully.
```

```
Reading File Content:
```

```
Student Name: Mandar Joshi  
Student Marks: 98
```

The screenshot shows an IDE interface. At the top, there are two tabs: 'task4.java 1' and 'students.txt'. The 'students.txt' tab is active, displaying the following content:

```
1 Student Name: Mandar Joshi  
2 Student Marks: 98
```

Commands Used(in cmd)

```
javac task4.java
```

```
java task4
```

```
git add .
```

```
git commit -m "Added task 4 File handling project"
```

```
git push
```
