

Task 2: Console-Based Mini Project

Goal

Build a simple console application to apply Java fundamentals.

Requirements

- Create a program like Student Management or Calculator
- Use user input via Scanner
- Apply conditional logic and loops

Mini Project : Calculator

Code Snippets:

```
import java.util.Scanner;
```

```
public class task2 {  
    public static void main(String[] args) {  
        Scanner sc = new Scanner(System.in);  
        int choice;  
        do {  
            System.out.println("\n**** SIMPLE CALCULATOR ****");  
            System.out.println("1. Addition");  
            System.out.println("2. Subtraction");  
            System.out.println("3. Multiplication");  
            System.out.println("4. Division");
```

```
System.out.println("5. Exit");
```

```
System.out.print("Enter your choice: ");
```

```
choice = sc.nextInt();
```

```
if (choice >= 1 && choice <= 4) {
```

```
    System.out.print("Enter first number: ");
```

```
    double num1 = sc.nextDouble();
```

```
    System.out.print("Enter second number: ");
```

```
    double num2 = sc.nextDouble();
```

```
    switch (choice) {
```

```
        case 1:
```

```
            System.out.println("Result = " + (num1 + num2));
```

```
            break;
```

```
        case 2:
```

```
            System.out.println("Result = " + (num1 - num2));
```

```
            break;
```

```
        case 3:
```

```
            System.out.println("Result = " + (num1 * num2));
```

```
            break;
```

```
        case 4:
```

```
            if (num2 != 0) {
```

```
                System.out.println("Result = " + (num1 / num2));
```

```
            } else {
```

```
                System.out.println("Cannot divide by zero!");
```

```
            }
```

```
            break;
```

```
    }
```

```

    } else if (choice == 5) {
        System.out.println("Exiting Calculator...");
    } else {
        System.out.println("Invalid Choice!");
    }
} while (choice != 5);
}
}

```

45         System.out.println(x: "Exiting Calculator...");
46     } else {
47         System.out.println(x: "Invalid Choice!");
48     }
49 } while (choice != 5);
50 }
51 }
52 }
```

Output:

```
**** SIMPLE CALCULATOR ****
```

```
1. Addition
```

```
2. Subtraction
```

```
3. Multiplication
```

```
4. Division
```

```
5. Exit
```

```
Enter your choice: 3
```

```
Enter first number: 23
```

```
Enter second number: 89
```

```
Result = 2047.0
```

```
**** SIMPLE CALCULATOR ****
```

```
1. Addition
```

```
2. Subtraction
```

```
3. Multiplication
```

```
4. Division
```

```
5. Exit
```

```
Enter your choice: 5
```

```
Exiting Calculator...
```

Commands

Used(in cmd)

```
javac task2.java
```

```
java task2
```
